# A Review of the MAP/K-PREP Linking Study and College Readiness (ACT) Benchmarks

Nate Jensen, Ph.D.  
Senior Research Scientist  
Northwest Evaluation Association

January 28<sup>th</sup>, 2016

Let's say we have an 8<sup>th</sup> grade student who took the MAP math test in the fall, and that he scored a 235.

- What do we know? His score would place him at the 69<sup>th</sup> percentile relative to other 8<sup>th</sup> graders in math (based on NWEA's 2015 status norms)
- But is this student on track to do well on the K-PREP? How about the ACT? How does his score compare to that of students at his favorite college?

# Presentation Overview

1. K-PREP / MAP Linking Study (2015)
2. MAP College Readiness (ACT) Benchmarks (2015)
3. Linking MAP Scores to College and Universities (2015)

*Partnering to help all kids learn*

# K-PREP / MAP Linking Study

# K-PREP / MAP Linking Study

- Primary purpose – Identify scores on the NWEA RIT scale that correspond with proficiency categories on the K-PREP
- Study based on matched student testing data; nearly 50,000 students who took both tests in spring '13 or '14
- Can determine if a student is “on-track” for proficiency after fall, winter, and spring testing
- Used an equipercentile method to generate these cutscores

## KENTUCKY LINKING STUDY

A Study of the Alignment of the NWEA RIT Scale  
with the Kentucky Performance Rating for  
Educational Progress (K-PREP) Testing Program

# College Readiness (ACT) Benchmarks

# College Readiness (ACT) Benchmarks

- Series of college readiness benchmarks for students in grade 5-9 in math and reading for both the fall and spring for ACT scores of 22 and 24
- Based on results from over 400 schools, 83K students, and 621k test events
- Uses longitudinal data from all students in these schools, not just those students who take the ACT (since that would introduce self-selection bias into these benchmarks)

# College Readiness Benchmarks (ACT 22 & 24)

Table 5: Normative Stringency and Classification Accuracy of Pooled Benchmarks for MAP Mathematics and Reading Tests

## Use your MAP score to explore colleges and universities

### Interested in learning which colleges might be a good fit for you?

Select the grade and term when you last took Measures of Academic Progress® (MAP®). Then set the RIT score sliders to a range that includes your most recent MAP reading and math scores. After you've made your selections, check the map to see the colleges in which your scores are likely to be near the median scores of students admitted to these schools. Based on your score, you may have a good chance of getting into these schools.

Click on a college to learn more about that school.
